Product Summary

Dienes has been leading the converting industry with the highest quality slitting equipment to the paper, film, and foil converting industry for more than 100 years. Dienes manufactures and stocks all standard knives for your converting processes from slitting, perforating, creasing, scalloping, and rewinding. Our industrial blades are manufactured from the highest quality tool steels and are available in a variety of metallurgies. Our close attention to tolerances and heat treating process assures our customers of a successful slitting operation. Dienes carries inventory to support all O.E.M. style knives as well as those where Dienes has set the standard. These knives include the Cameron 793A as well as Dusenbury score blades also known as crush cut knives. In addition Dienes has manufacturing locations all around the globe including one in the USA ready and able to meet specialty blade manufacturing to meet your needs. For more information call Dienes or click on request information and send us an email.
