Product Summary

Top Dished Knives/Slitters Manufactured from finest quality tool steels. These knives are made from a variety of metallurgies providing our slitting customers with the right balance between economy and knife life. Dienes' 100 years of experience manufacturing knives has given us the expertise and know how both in heat treating and grinding to produce the very best the market has available. Working with highly trained slitting experts we can recommend a variety of bevel configurations, single, double, or double hollow bevel, optimizing your cut quality. Polished, super finished, and Teflon coated knives are available to reduce adhesive build up and lessen dust generation as a result of the slitting action. Dish knives are stocked with plain and bayonet/ breach lock bores to meet your requirements. Knife Longevity, Cut quality and Economy; Call Dienes.
