Product Summary

We offer various solutions that are primarily used in the steel industry, transformer sheet industry, and in the non-ferrous metal industry. Our product range includes a wide variety of shear blades (bowtie or straight shear design), scrap chopper blades, and customer-specific blades with a length of up to 236 in. (6000 mm). Our knives are made of high alloy tool steel, powder metallurgical steel, or Johann Krumm special knife materials. Whether for precision applications in the thin strip area or heavy gauge slitting up to a material thickness of 0.787 in. (20.0 mm), in combination with different material strengths, our tools will be tailored for the particular slitting application. Through many years of experience and knowledgeable technical advice, we help our customers achieve a continuous and trouble free production process by using our high precision tools.
