EZ KNIFE PULLER

TOTAL CONTROL

EZ Knife Puller: Patent Applied

EZ KNIFE PULLER BLADE REMOVER

With full operator control, the DIENES EZ Knife Puller securely surrounds the knife blade and prevents blade tip damage along with worry free knife blade removal and replacement.

While removal and replacement of knife blades are necessary, the method to do so has been in long need of a better way. DIENES **EZ Knife Puller** provides protection and control of the knife blade while preventing damage during removal.

Benefit

- | Used to remove and install blades.
- | Reduces operator risk while replacing and removing the knife blades.
- | Easy to use.
- | Prevent blade tip damage while removing the knife blades.
- | No need for operator to physically touch the knives.
- | EZ Knife Puller **securely** surrounds the knife blade.
- | Quicker knife changes.

Components

- | Hand tool with plier style gripping.
- | Specially designed tips that surround the score cut hub.
- | Surrounding type of clamping method.
