

DF-19-105

The Dienes Model DF-19-105 shear knife holder provides zero clearance vertical and horizontal stroke support for exceptional blade stiffness in operation. Slit widths to 19mm (0.748") are possible. Originally developed for the aluminum foil industry, with a rigid flat blade, the DF-19 also has a dish blade design for synthetic and other softer materials.

Two Year Warranty!

Specifications:

Minimum slit width:	19 mm (0.75")
Operating Pressure:	55-90 psi
Maximum web speed:	2,500 fpm

DF-19-105 holder P3105-0005 & P3105-0006

Replacement dish blade #22138

Replacement flat blade #022502

Options:

ES-Tab™, 360° Guard

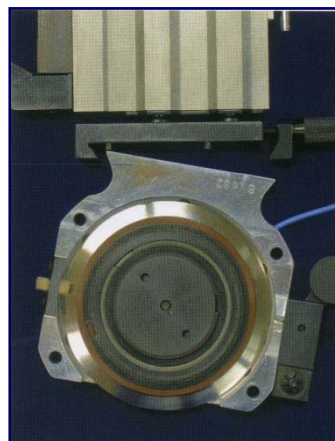

Razor lower head assembly; (3) blades

Crush cut lower head assembly

Angle Plates 15', 30', 45'

Quik-Change blade heads for Shear, Crush and Razor slitting

Removable Knife Head

Recent advancements have included interchangeable, quick replacement lower heads for replacing dull blades, or if crush cutting or razor slitting is preferred over shear slitting for a particular web material. A simple Turn Knob release allows knife head changes with the knife body remaining on the machine.
